Chapter 7 Solutions And Colloids - seapa.org

Solutions exhibit completely different behavior from suspensions. A solution may be colored, but it is transparent, the molecules or ions are invisible, and they do not settle out on standing. A group of mixtures called colloids (or colloidal dispersions) exhibit properties intermediate between those of suspensions and solutions . The particles in a colloid are larger than most simple molecules; however, colloidal particles are small enough that they do not settle out upon standing.
