We use Newtons (N) to measure force. Net force is the sum of all the forces and has direction. (Be sure to make right positive and left negative.) An object will move in the direction of the net (or unbalanced) force. - 400 N + 200 N Net Force = + 200 N - 400 N = - 200 N (left) Newton's Second Law $F = ma$ tells us: Force (in Newtons) $F = ma$

Isaac Newton S 3 Law Of Motion Cstephenmurray Answer

Newton's second law of motion pertains to the behavior of objects for which all existing forces are not balanced. The second law states that the acceleration of an object is dependent upon two variables - the net force acting upon the object and the mass of the object. The acceleration of an object depends directly upon the net force acting upon

the object, and inversely upon the mass of the object.
