Chemistry 214 Quantitative Chemical Analysis

The bubbling was due to the production of CO 2.. The test of vinegar with potassium carbonate is one type of quantitative analysis —the determination of the amount or concentration of a substance in a sample. In the analysis of vinegar, the concentration of the solute (acetic acid) was determined from the amount of reactant that combined with the solute present in a known volume of the solution.

4.5 Quantitative Chemical Analysis - Chemistry 2e | OpenStax

quantitative chemical analysis method involving the separation of an analyte from a sample by a physical or chemical process and subsequent mass measurements of the analyte, reaction product, and/or sample. indicator. substance added to the sample in a titration analysis to permit visual detection of the end point.

Quantitative Chemical Analysis | Chemistry

Quantitative chemical analysis, branch of chemistry that deals with the determination of the amount or percentage of one or more constituents of a sample. A variety of methods is employed for quantitative analyses, which for convenience may be broadly classified as chemical or physical, depending upon which properties are utilized.

quantitative chemical analysis | Definition, Types ...

Quantitative analysis refers to the determination of how much of a given component is present in a sample. The quantity may be expressed in terms of mass, concentration, or relative abundance of one or all components of a sample. Here are a few sample results of quantitative analysis: Ore contains 42.88% silver by mass.
