National Building Code of Canada, 2010

The NBC sets out technical provisions for the design and construction of new buildings in Canada. It also applies to the alteration, change of use, and demolition of existing buildings. The NBC is available in two volumes and comprises three divisions: A, B and C. Division A includes the compliance options, the objectives, and the functional statements. Division B contains the provisions, referred to as acceptable solutions, relating to such issues as fire protection, occupant safety and accessibility; structural design; environmental separation; heating, ventilating, and air-conditioning; plumbing services; safety measures at construction and demolition sites; and housing and small buildings. Division C contains administrative provisions. Volume 1 contains Divisions A and C along with the attribution tables of Division B. Volume 2 contains Division B, appendices, and index.

The Architect's Studio Companion

Rules of Thumb for Preliminary Design *John Wiley & Sons*

The architect's favorite handbook-more informative and easier to use than ever! The Architect's Studio Companion is the laborsaving design resource that architects and builders have relied on for years. Now in its fourth edition, this industry standard continues its reputation as a reliable tool for the preliminary selecting, configuring, and sizing of the structural, mechanical, and egress systems of a building. Bestselling authors Edward Allen and Joseph Iano reduce complex engineering and building code information to simple approximations that enable the designer to lay out the fundamental systems of a building in a matter of minutes and get on with the design. Now in a flex binding that makes it even easier to use, The Architect's Studio Companion, Fourth Edition provides quick access to reliable rules of thumb that offer vital help for selecting, configuring, and sizing: * Structural systems * Heating, cooling, and electrical systems * Egress provisions, including exit stairways, parking garages, and parking lots * Daylight provisions The book concludes with precalculated tables of building code height and area limitations.

Issues Paper on the National Building Code of Canada : a Report CMHC

The 1995 edition of the National Building Code (NBC), National Fire Code, Canadian Housing Code, Canadian Plumbing Code and Canadian Farm Building Code are all in their final stages of review. The texts of two new codes --the National Energy Code for Houses, and the National Energy Code for Buildings --are also due to be issued in 1995. This report describes the origins and evolution of the National Building Code and outlines the proposed code revisions for the 1995 edition. It also reviews the five principal issues concerning building codes and regulations in Canada today. They include: -The harmonization of building regulations across Canada; -The expanding scope of national model codes; -The daunting challenge of code revision; -The impact of building code changes on construction costs, housing affordability and global competitiveness; and -The enforcement of building regulations.

Elements of Earthquake Engineering and Structural Dynamics Presses inter Polytechnique

Earthquake engineering is the ultimate challenge for structural engineers. Even if natural phenomena such as earthquakes involve great uncertainties, structural engineers need to design buildings, bridges, and dams capable of resisting the destructive forces produced by earthquakes. However, structural engineers must rely on the expertise of other specialists to realize these projects. Thus, this book not only focuses on structural analysis and design, but also discusses other disciplines, such as geology, seismology, and soil dynamics, providing basic knowledge in these areas so that structural engineers can better interact with different specialists when working on earthquake engineering projects."

Mega Quakes: Cascading Earthquake Hazards and Compounding Risks

Frontiers Media SA

Large-scale earthquake hazards pose major threats to modern society, generating casualties, disrupting socioeconomic activities, and causing enormous economic loss across the world. Events, such as the 2004 Indian Ocean tsunami and the 2011 Tohoku earthquake, highlighted the vulnerability of urban cities to catastrophic earthquakes. Accurate assessment of earthquake-related hazards (both primary and secondary) is essential to mitigate and control disaster risk exposure effectively. To date, various approaches and tools have been developed in different disciplines. However, they are fragmented over a number of research disciplines and underlying assumptions are often

inconsistent. Our society and infrastructure are subjected to multiple types of cascading earthquake hazards; therefore, integrated hazard assessment and risk management strategy is needed for mitigating potential consequences due to multi-hazards. Moreover, uncertainty modeling and its impact on hazard prediction and anticipated consequences are essential parts of probabilistic earthquake hazard and risk assessment. The Research Topic is focused upon modeling and impact assessment of cascading earthquake hazards, including mainshock ground shaking, aftershock, tsunami, liquefaction, and landslide.

Snow Engineering: Recent Advances

Proceedings of the third international conference, Sendai, Japan, 26-31 May 1996 *CRC Press*

The objective of the conference was to provide a forum for engineers, architects and scientists to discuss a broad range of research and design methods for various problems related to snow engineering. Specialists in building and civil engineering, environmental engineering, energy engineering, urban planning, and regional development as well as snow scientists were brought together for the conference. The technical sessions were in five thematic areas as follows: Snow technology and science; Building and construction engineering; Infrastructure and transportation; Housing and residential planning; Development strategy in snow countries. The 115 papers provide keys to realize more comfortable living conditions in snow countries and to overcome many problems in heavy snow regions.
