The topics covered include languages and language extensions for parallel computing - a status report on CONSUL, a future-based parallel language for a general-purpose high-parallel computer; COOL, blackboard programming in shared Prolog, refined C,

(PDF) Languages and Compilers for Parallel Computing ...

Source-to-source compilers are a type of compiler that takes a high-level language as its input and outputs a high-level language. For example, an automatic parallelizing compiler will frequently take in a high-level language program as an input and then transform the code and annotate it with parallel code annotations (e.g. OpenMP) or language constructs (e.g. Fortran's DOALL statements).
