a) Collaborative Learning. In this mode of learning, each student makes progress individually in-line with the progress made by others. If this method is properly directed by the teacher, then the students themselves can learn to manage the method with no further instructions. There are many benefits of collaborative learning. For example, it helps the students to recognize the aspect of difference, both in themselves and in others through working separately but in tandem.

Difference Between Cooperative and Collaborative Learning ...

Cooperative learning is an educational approach which aims to organize classroom activities into academic and social learning experiences. There is much more to cooperative learning than merely arranging students into groups, and it has been described as "structuring positive interdependence." Students must work in groups to complete tasks collectively toward academic goals. Unlike individual learning, which can be competitive in nature, students learning cooperatively can capitalize on one another.

Cooperative learning - Wikipedia

In cooperative learning, students work together in small groups on a structured activity. They are individually accountable for their work, and the work of the group as a whole is also assessed....

Cooperative and Collaborative Learning: Explanation

Cooperative Learning, sometimes called small-group learning, is an instructional strategy in which small groups of students work together on a common task. The task can be as simple as solving a multi-step math problem together, or as complex as developing a design for a new kind of school.
