The Science Of Fasting And

Fasting is not a new idea. People have been fasting for centuries and the scientists of the 1800s and 1900s were interested in what happens to our bodies when we fast. They worked out how the different hormones control how we store food for use during fasting. Fasting was used as a treatment for diabetes before the discovery of insulin in 1922 and was also used as a treatment for obesity until the mid-1960s, but the prolonged fasting used to cure obesity in those

days proved dangerous and so ...

Science of fasting - the basics | FastDay Intermittent Fasting

All intermittent fasting methods are essentially based on the same idea: When you reduce your caloric intake, your body will use its stored fat for energy. But what makes intermittent fasting different from simply cutting calories is the possibility that it's easier for people to restrict calories for limited stretches of time rather than for the days, weeks and months demanded by conventional diets.
