Single Document Interface In Mfc

MFC makes it easy to work with both single-document interface (SDI) and multiple-document interface (MDI) applications. SDI applications allow only one open document frame window at a time. MDI applications allow multiple document frame windows to be open in the same instance of an application. An MDI application has a window within which multiple MDI child windows, which are frame windows themselves, can be opened, each containing a separate

document.
