is concerned only with the interface between the DBS MFTS and Registered Bodies' systems using the internet and Public Services Network.

Interface Control Document

An interface control document (ICD) is a formalized description of the methods and structures involved in providing input for and receiving output from a specific system. The system that is described by the interface control document can be a software library or a piece of hardware. The document does not have to follow any single format but can be a collection of paragraphs, charts or even just technical drawings of the interface hardware.

What Is an Interface Control Document?

For example, common interfaces for computer peripherals may include USB, serial, parallel ports, etc; common interfaces for system users may include monitors, keyboards, mice, etc. Interfaces are documented using interface control documents (ICD) that describe the system's interfaces as well as any rules for communicating with them.

PMG | Interface Control - Description

In the example above, if System 1 exists, the owner of the system will have documented these interfaces in a configuration controlled document so others, System 2, can be designed to

interface with System 1 per that definition. In this case, System 1 does not know of System 2's existence. System 1 has no requirements to interface with System 2.

Everything you wanted to know about interfaces, but were ...
