Multiple Optimal Solutions in Linear Programming Models

The concept of multiple optimal solutions is associated with the linear programming problems. The multiple optimal solutions will arise in a linear program with more than one set of basic solutions that can minimize or maximize the required objective function. Sometimes, the multiple optimal solutions are called the alternative basic solution.

Multiple or Alternative optimal Solutions

In some of the linear programming problems we face a situation that the final basic solution to the problem need not be only one, but there may be alternative or infinite basic solutions, i.e., with different product mixes, we have the same value of the objective function line (namely the profit).

From Wikipedia, the free encyclopedia Multi-objective linear programming is a subarea of mathematical optimization. A multiple objective linear program (MOLP) is a linear program with more than one objective function. An MOLP is a special case of a vector linear program.

Multi-objective linear programming - Wikipedia

An alternate optimal solution is also called as an alternate optima, which is when a linear / integer programming problem has more than one optimal solution. Typically, an optimal solution is a solution to a problem which satisfies the set of constraints of the problem and the objective function which is to maximize or minimize. Example: Here, the graphical analysis of a problem is given with set of ($\leq$) constraints and a maximizing objective function. The optimal solution set is a smaller ...
