Standard Solution Definition Analytical Chemistry

A standard solution is any chemical solution which has a precisely known concentration. Similarly, a solution of known concentration has been standardized. To prepare a standard solution, a known mass of solute is dissolved and the solution is diluted to a precise volume. Standard solution concentration is usually expressed in terms of molarity (M) or moles per liter (mol/L).

Standard Solution Definition - Chemistry Glossary

In analytical chemistry, a standard solution is a solution containing a precisely known concentration of an element or a substance. A known weight of solute is dissolved to make a specific volume. It is prepared using a standard

substance, such as a primary standard. Standard solutions are used to determine the concentrations of other substances, such as solutions in titration.
