Drought In Arid And Semi Arid Regions A Multi Disciplinary ...

Semi-permanent drought produces arid biomes such as deserts and grasslands. Prolonged droughts have caused mass migrations and humanitarian crisis. Most arid ecosystems have inherently low productivity. The most prolonged drought ever in the world in recorded history occurred in the Atacama Desert in Chile (400 Years).

Drought in Arid and Semi-Arid Regions: A Multi-Disciplinary and Cross-Country Perspective: Schwabe, Kurt, Albiac, Jose, Connor, Jeffery: Amazon.com.au: Books

Drought in Arid and Semi-Arid Regions: A Multi ...

Droughts can have a severe impact on the dynamics of animal populations, particularly in semi-arid and arid environments where herbivore populations are strongly limited by resource availability. Increased drought intensity under projected climate change scenarios can be expected to reduce the viability of such populations, yet this impact has seldom been quantified.

Predicting the Future Impact of Droughts on Ungulate ...

Arid and semi-arid regions are generally characterized by water scarcity and low per capita water allocation. This situation is further exacerbated when such areas are agriculturally dominated with high-density residential areas. Faria catchment (320 km²), located in the northeastern part of the West Bank, Palestine, is one of these arid to semi-arid catchments where recently, the prolonged

drought periods in the catchment and the increasing water demand have made the existing obtainable ...

Spatio-temporal Drought Analysis in Arid and Semi-arid ...

Arid and semi-arid regions of China (ASRC) are increasingly threatened by drought. Especially when drought and heat extremes coincide, the resultant impact would be even more harmful to human society and the natural environment. This study investigates the spatio-temporal changes in concurrent drought and heat extremes in ASRC during 1961 ...

Changes of concurrent drought and heat extremes in the ...

Precipitation regimes have been predicted to shift to more extreme patterns that are characterized by heavy rainfall events and longer dry intervals. Spatiotemporal variation of precipitation extremes may significantly influence the local ecosystem, especially in the arid and semi-arid regions. This study investigated the variations in extreme precipitation indices across the arid and semi-arid land of China from 1960–2018.

Variations in precipitation extremes in the arid and semi ...

drought and emergency feed-supplies is only sporadically taken on board. The consequence is that in the face of a climatic anomaly such as drought, or a fast-spreading epizootic such as rinderpest, the impact on livestock producers in the semi-arid and arid zones is often severe. The reasons for this are not far to seek.
