It is possible, however, to disturb that equilibrium by changing conditions. For example, you could increase the concentration of one of the products, or decrease the concentration of one of the reactants, or change the temperature. When a change of this type is made in a reaction at equilibrium, the reaction is no longer in equilibrium.

Likewise, if you change the conditions of an equilibrium, it will change in a way that partially undoes whatever it is you did to it in the first place. Change in Concentration Let's say that you're doing a reaction with the equation $A + B \rightleftharpoons C$. Le Chatelier's principle says that if we change the concentration, the position of the equilibrium will also change.
