Bloom's taxonomy of educational objectives This material is largely drawn from a handout from Dr Robert Kleinsasser (School of Languages and Comparative Cultural Studies, UQ). He acknowledges that the verb lists come from the Washington State Board of Vocational Education.

Bloom's taxonomy is a set of three hierarchical models used to classify educational learning objectives into levels of complexity and specificity. The three lists cover the learning objectives in cognitive, affective and sensory domains. The cognitive domain list has been the primary focus of most traditional education and is frequently used to structure curriculum learning objectives, assessments and activities. The models were named after Benjamin Bloom, who chaired the committee of educators

Like cognitive objectives, affective objectives can also be divided into a hierarchy (according to Krathwohl). This area is concerned with feelings or emotions (and social/emotional learning and skills). Again, the taxonomy is arranged from simpler feelings to those that are more complex.

Bloom's taxonomy, taxonomy of educational objectives, developed in the 1950s by the American educational psychologist Benjamin Bloom, which fostered a common vocabulary for thinking about learning goals.
