Changing Security Theory to Security Practice

One of the most elaborated psychological models based on systems theory is the Zurich Model of Social Motivation by Bischof. This model postulates the existence of three basic motives or needs: the needs for security, arousal, and autonomy. Each of these is treated in a specific homeostatic subsystem, which is represented as a negative feedback loop.

Systems Theory - an overview | ScienceDirect Topics

Some of the ideas and concepts systems theory has brought to

the field include: Families and other social groups are systems having properties which are more than the sum of the properties of their parts. Every system has a boundary, the properties of which are important in understanding how the system works.

The application of systems theory - UKessays.com

Systems theory is the interdisciplinary study of systems. A system is a cohesive conglomeration of interrelated and interdependent parts which can be natural or human-made. Every system is bounded by space and time, influenced by its environment, defined by its structure and purpose, and expressed through its functioning. A system may be more than the sum of its parts if it expresses synergy or emergent behavior. Changing one part of a system may affect other parts or the whole system. It may be
