I recently purchased a
2000 Jetta with a 2.0
engine and manual
trans. I've only driven it
twice since I bought it,
but when I took it out
today I noticed the idle
speed was not
constant. Some times
it idles around 900
RPM. Other times it
idles around 1800 RPM.

It idles smoothly and
does not fluctuate, but
it seems to pick one of
those idle speeds at
random.
