The Golden Key *Ravenio Books*

I have compressed this essay into a few pages. Had it been possible I would have reduced it to as many lines. It is not meant to be an instructional treatise, but a practical recipe for getting out of trouble. Study and research are well in their own time and place, but no amount of either will get you out of a concrete difficulty. Nothing but practical work in your own consciousness will do that.

The mistake made by many people, when things go wrong, is to skim through book after book, without getting anywhere. Read the Golden Key several times. Do exactly what it says, and if you are persistent enough you will overcome any difficulty.

The Sermon on the Mount

The Key to Success in Life *Harper Collins*

What did Jesus teach? Distilled from years of study and lecture, affirmed by nearly a million readers over the last fifty years, Emmet Fox's answer in *The Sermon on the Mount* is simple. The Bible is a "textbook of metaphysics" and the teachings of Jesus express--without dogma--a practical approach for the development of the soul and for the shaping of our lives into what we really wish them to be. For Fox, Jesus was "no sentimental dreamer, no mere dealer in empty platitudes, but the unflinching realist that only a great mystic can be." In his most popular work, Emmet Fox shows how to: Understand the true nature of divine wisdom. Tap into the power of prayer. Develop a completely integrated and fully expressed personality. Transform negative attitudes into life-affirming beliefs. Claim our divine right to the full abundance of life.

Ghost Boys *Little, Brown Books for Young Readers*

through history, from award-winning author Jewell Parker Rhodes. Only the living can make the world better. Live and make it better. As a ghost, he observes the devastation that's been unleashed on his family and community in the wake of what they see as an unjust and brutal killing. Soon Jerome meets another ghost: Emmett Till, a boy from a very different time but similar circumstances. Emmett helps Jerome process what has happened, on a journey towards recognizing how historical racism may have led to the events that ended his life. Jerome also meets Sarah, the daughter of the police officer, who grapples with her father's actions. Once again Jewell Parker Rhodes deftly weaves historical and socio-political layers into a gripping and poignant story about how children and families face the complexities of today's world, and how one boy grows to understand American blackness in the aftermath of his own death.

Power Through Constructive Thinking *Pickle Partners Publishing*

Originally published in 1932 by the renowned New Thought spiritual leader Emmet Fox, this book is intended to teach the principles of life-building through constructive thought. "All power lies is creative thought. Thought is the key to life; for as a man thinketh in his heart, so is he. People are beginning to understand today something of the power of thought to shape the individual's destiny—they know vaguely that thoughts are things—but how the Great Law of thought is to be applied they do not know. "This book shows that your destiny is really in your own hands, because it is impossible to think one thing and produce another, and that by the selection of correct thought a harmonious and happy life is produced. It shows that weak and fickle thinking produces a drifting and wasted life, and that positive thinking produces success and happiness. It shows that fear is the ultimate cause of Tap-Root of all sickness, failure, and disappointment. And it shows the only possible method of overcoming fear."

Against Our Will

Men, Women and Rape *Open Road Media*

Susan Brownmiller's groundbreaking bestseller uncovers the culture of violence against women with a devastating exploration of the history of rape—now with a new preface by the author exposing the undercurrents of rape still present today. *Rape*, as author Susan Brownmiller proves in her startling and important book, is not about sex but about power, fear, and subjugation. For thousands of years, it has been viewed as an acceptable "spoils of war," used as a weapon by invading armies to crush the will of the conquered. The act of rape against women has long been cloaked in lies and false justifications. It is ignored, tolerated, even encouraged by governments and military leaders, misunderstood by police and security organizations, freely employed by domineering husbands and lovers, downplayed by medical and legal professionals more inclined to "blame the victim," and, perhaps most shockingly, accepted in supposedly civilized societies worldwide, including the United States. *Against Our Will* is a classic work that has been widely credited with changing prevailing attitudes about violence against women by awakening the public to the true and continuing tragedy of rape around the globe and throughout the ages. Selected by the *New York Times Book Review* as an Outstanding Book of the Year and included among the New York Public Library's Books of the Century, *Against Our Will* remains an essential work of sociological and historical importance.

The Nevada Test Site *Princeton University Press*

"Emmet Gowin likes to ask a provocative question: "Which country on earth has had the largest number of nuclear bombs detonated within its borders?" The answer is the United States. Covering approximately 680 square miles, the Nevada National Security Site, formerly known as the Nevada Test Site, was the primary testing location of American nuclear devices from 1951 to 1992; 1,021 announced nuclear tests occurred there, 921 of which were underground. The site, which is closed to the public, including its airspace, contains 28 areas, 1,100 buildings, 400 miles of paved roads, 300 miles of unpaved roads, 10 heliports, and two airstrips. Its surface is covered with subsidence craters from testing, and in places looks like the moon. In 1996, Gowin received permission to document the landscape by air, after over a decade of working to secure access. These aerial views of environmental devastation--made quietly majestic but no less potent in the hands of a master photographer--unveil environmental travesties on a grand scale. While groups of images from the Nevada Test Site series have been published previously, this book will produce the largest number yet, and three quarters of the pictures will not have been published at all. Gowin is the only photographer to have been granted access to this site, which is now permanently closed, post-9/11. Other than images made by the government for geographic purposes, no other images of this landscape exist. The book will feature a preface by photographer Robert Adams (America, b. 1937), whose photographic and written work is concerned with landscape, urbanization, and activism. It will also feature an afterword by Gowin on how he made the images, and their significance to him

today."--Provided by publisher.

The Golden Key to Prayer *DMC*

Prayer will enable you to get yourself, or anyone else, out of any difficulty on the face of the earth. It is the Golden Key to harmony and happiness. To those who have no acquaintance with the mightiest power in existence, this may appear to be a rash claim, but it needs only a fair trial to prove that, without a shadow of doubt, it is a just one. You need take no one's word for it, and you should not. Simply try it for yourself, and see.

The One Hundred Circle Farm *Princeton University Press*

A powerful photographic survey of the impact of irrigation systems on the landscape of the United States. In *The One Hundred Circle Farm*, renowned photographer Emmet Gowin (b. 1941) presents stunning aerial images of center-pivot irrigation systems in the western and midwestern United States. This type of farming involves a method of watering crops in which equipment rotates around a centrally drilled well, creating enormous, distinct circles of irrigated land, often in the midst of dry terrain. Anyone who has taken a cross-country flight has likely seen countless acres of these iconic symbols of industrial agriculture. Through a faithful and at once personal photographic survey, Gowin's powerful images not only bear witness to the ambitions humans wield in shaping the landscape, but also attest to how such primal elements--circles, pivots, and lines--symbolize water depletion and the fragile environment. The stark black-and-white and color compositions, one hundred in all, were created over the course of a decade. Fields resemble lost civilizations; crops gape like strange new suns. Hauntingly beautiful, the photographs highlight Earth's nourishing geology and the sweat of human labor. With an afterword by anthropologist Lucas Bessire discussing the history and impact of pivot irrigation on American farming, *The One Hundred Circle Farm* stands as a poetic visual record, evidence of the tenuous connections between human enterprise and our planet's most precious resource.
