Information ethics has been defined as "the branch of ethics that focuses on the relationship between the creation, organization, dissemination, and use of information, and the ethical standards and moral codes governing human conduct in society". It examines the morality that comes from information as a resource, a product, or as a target. It provides a critical framework for considering moral issues concerning informational privacy, moral agency, new environmental issues, problems arising from

**Information ethics - Wikipedia**

Computer ethics is a part of practical philosophy concerned with how computing professionals should make decisions regarding professional and social conduct. Margaret Anne Pierce, a professor in the Department of Mathematics and Computers at Georgia Southern University has categorized the ethical decisions related to computer technology and usage into three primary influences:

**Computer ethics - Wikipedia**

Technology ethics are principles that can be used to govern technology including factors such as risk management and individual rights. The following are common areas of technology ethics.

**20 Types of Technology Ethics - Simplicable**

Technology ethics is the application of ethical thinking to the practical concerns of technology. The reason technology ethics is growing in prominence is that new technologies give us more power to act, which means that we have to make choices we didn't have to make before.

**Technology Ethics - Markkula Center for Applied Ethics**

Digital information is nonexclusory, meaning we can all, at least theoretically, possess the same digital information without excluding its use from others. This is because copying digital information from one source to another does not require eliminating the previous copy.
