Voltages and currents also carry power. Again using the convention shown in Fig. 3.1.1 for circuit elements, the instantaneous power at each moment of time consumed by the element is given by the product of the voltage and current. (3.1.1) p (t) = v (t) i (t) A positive value for power indicates that at time.

About Electrical Engineering. Electrical engineers are primarily concerned with the generation, control, transmission, and distribution of electric energy, signals, and information. This may be on a large scale, such as designing a more reliable power grid, or a small scale, such as developing components for a new medical device or cell phone. Graduates could design power systems in Baton Rouge, work on flight control systems in San Diego, help maintain an oil rig in the Gulf of Mexico, or ...
