Spread Moored Or Turret Moored

The description of Spread Moored versus Turret Moored Systems are highlighted in terms of design and performance. A spread moored system is moored in a fixed orientation and more sensitive to global environment intensity and direction. The spread moored system is typically installed with its bow towards the prevailing environment.

Comparison of Spread Moored vs. Turret Moored Systems

Spread mooring systems are multi-point mooring systems that moor vessels to the seabed using multiple mooring lines. While the vessel is in a fixed heading relative to the

seabed, its bow typically heads into the dominant environment which is usually the direction where the largest waves are coming from.
