Esthetic and Restorative Dentistry : Material Selection ...

In the past 10 to 20 years, significant advances in restorative materials have revolutionized dentistry. 1-5 Esthetic considerations are growing in importance for the restoration of posterior teeth. 6 Composite, compomers, glass-ionomers, and resin-modified glass ionomers (RMGIs) have given dentists a viable and esthetic alternative to amalgam restorations. These materials have become more desirable restoratives because they provide patients with a superior esthetic result, with acceptable ...

Direct Esthetic Adhesive Restorative Materials

Acrylic resins replaced silicate cements in the middle of the 20th century as the only esthetic material in dentistry. 1 However, due to dependence on properties that could only be delivered with adequate bonding concepts that had not yet been discovered, the benefits of such an evolution were minimal at best. 2 Advancements in bonding technology would go hand in hand with the success of acrylic resins.
