Fouling, modelling and wastewater treatment are dominating research areas for UF membranes which accounted for 27 %, 17 %, and 12 % of the total publication output, respectively.

Ultrafiltration membranes for wastewater and water process ...

Filtering out contaminants, even at the nano scale, membranes are a mainstay of water and wastewater treatments. In water treatment, membranes are barriers that allow water to pass through but stop unwanted substances from passing through with it. Working much like the cell walls in our bodies, technical membranes filter out salts, impurities, viruses, and other particles from water.
