The revised 2 nd edition of this practical book provides an expanded treatment and comparison of techniques used in advanced optical measurements, guiding its reader from fundamental radiometric and photometric concepts to the state-of-the-art in highly sensitive measurements of optical losses and in spectroscopic detection using coherent laser light and spontaneous radiation. The book describes and compares a broad array of high-sensitivity methods and techniques – from interferometric ...

Photometry, Radiometry, and Measurements of Optical Losses ...

The conversion between photometric units which take into account human physiology and straight radiometric units is given by the following: (photometric unit) = (radiometric unit) x (683) x V() where V() is the 'Photopic Response,' shown earlier and basically tells us how efficiently the eye picks up certain wavelengths of light.
