Entropy Vector Connecting Science And Business

The entropic vector or entropic function is a concept arising in information theory. It represents the possible values of Shannon's information entropy that subsets of one set of random variables may take. Understanding which vectors are entropic is a way to represent all possible inequalities between entropies of various subsets.

Entropic vector - Wikipedia

Entropy is a measurement that we have spent some time discussing above, particularly as a means of measuring the goodness of fit of a model. Entropy as a tool for use in information science and knowledge generation originated with Claude Shannon and his groundbreaking work on information theory in communications [Shan48]. Entropy is related to the maximum amount of information that can be conveyed by a certain number of bits.
