Area Of Irregular Shapes provides you with four larger than average shapes on a cm square grid to find the area of - I usually ask the class which shape has the largest area and then everyone finds

the area of at least two shapes. Area Of Rectangles finding the area of rectangles on a cm square grid - leading to the formula $A = \text{Length} \times \text{Width}$.

Area Of Irregular Shapes and Rectangles | Teaching Resources

Land area calculation. Calculating areas of irregular polygons is a non-trivial task without sophisticated surveying instruments. One way to calculate areas of such plots, is to break them into a number of triangular-shaped plots as in image shown below and then find the area of each triangle using Heron's formula and sum them up. As illustrated in the figure, a four-sided plot will have two triangular plots (a-d-e and b-c-e).
