Design types and sub-types. There are many ways to classify research designs. Nonetheless, the list below offers a number of useful distinctions between possible research designs. A research design is an arrangement of conditions or collection. Descriptive (e.g., case-study, naturalistic observation, survey)

Research design - Wikipedia

This example of design experiments is attributed to Harold Hotelling, building on examples from Frank Yates. The experiments designed in this example involve combinatorial designs. Weights of eight objects are measured using a pan balance and set of standard weights. Each weighing measures the weight difference between objects in the left pan and any

objects in the right pan by adding calibrated weights to the lighter pan until the balance is in equilibrium.

Design of experiments - Wikipedia

Examples of designs. There are many good examples of what can be design protected. Here you can read about some of them. Find out about everything from the design of sweets to truck design. There are also designs which have come about as a solution to a problem. For example, doormats with clever messages and a bag that makes it easy to return deposit bottles.
