National Carbon :: Slip Rings & Commutators

A slip ring (in electrical engineering terms) is a method of making an

electrical connection through a rotating assembly. Formally, it is an electric transmission device that allows energy flow between two electrical rotating parts, such as in a motor. Slip rings on a hydroelectric generator; A - stationary spring-loaded graphite brushes,

Slip ring - Wikipedia

Slip rings are used in rotating electrical assemblies to make a continuous electrical connection between stationary and moving conductors. This enables the stationary power source to transmit electrical power to the rotating component. Basically, a slip ring is a band of electrically conductive material mounted on a shaft.

Purpose of Slip Rings in an

Alternator | Electrical Concepts

A Slip Ring Unit is an electromechanical device which allows the transmission of power and electrical signals from a stationary to a rotating structure. Slip Rings can be used in any electromechanical system which requires unrestrained, intermittent or continuous rotation while transmitting power and/or data.
