Applied Research Design

A Practical Guide *SAGE Publications*

To help researchers and students make the transition from the classroom and laboratory to research in the 'real world,' the authors reveal the pitfalls and suggest strategies to overcome problems in the design and planning of applied research. They also explore how to assess the human and material resources that will be needed at

different times while conducting an applied research design to facilitate the management of data collection, analysis, and interpretation.

Embodied Performance as Applied Research, Art and Pedagogy *Springer*

This book follows a physically disabled researcher's journey from stigmatized embodiment on her way to creating accessible storytelling performances. These unique performances function not only as traditional, peer-reviewed forms of critical qualitative research, but also as ‘narrative teaching productions’ that guide students and their audiences in the pursuit of social justice and equality.

The book begins by developing the author's personal standpoint, and provides an evocative discussion of the multiple perceptions and identities experienced by those with disabled bodies. It negotiates how performance research can be created and conducted within the confines of course learning objectives, moves through complications encountered in research design and data collection, and explores a range of insightful responses from community members, social activists, and performance critics, as well as more traditional academic audiences. Critical autoethnographic personal narratives, performance scripts, and poetry are used to illuminate struggles over legitimate methodological practice and storytelling performance pedagogy. Each

chapter confronts the fear of mortality that presses us to stigmatize those who remind us of our inescapably vulnerable embodiments and offers hope for an inclusive, adaptable culture. The book will be compelling reading for scholars in Performance Studies, Disability Studies, Cultural Studies, Narrative Methodology, Ethnography, Higher Education, Autoethnography, Creative Nonfiction and everyone interested embodiment and/or storytelling for social change. Please visit www.uncwstorytelling.org/chapter-summaries-1 to access supplementary material for the book.

Multilevel Analysis for Applied Research

It's Just Regression! *Guilford Press*

This book provides a uniquely accessible introduction to multilevel modeling, a powerful tool for analyzing relationships between an individual-level dependent variable, such as student reading achievement, and individual-level and contextual explanatory factors, such as gender and neighborhood quality. Helping readers build on the statistical techniques they already know, Robert Bickel emphasizes the parallels with more familiar regression models, shows how to do multilevel modeling using SPSS, and demonstrates how to interpret the results. He discusses the strengths and limitations of multilevel analysis and explains specific circumstances in which it offers (or does not offer) methodological advantages over more

traditional techniques. Over 300 dataset examples from research on educational achievement, income attainment, voting behavior, and other timely issues are presented in numbered procedural steps.

Basic and Applied Research

The Language of Science Policy in the Twentieth Century *Berghahn*

Books

The distinction between basic and applied research was central to twentieth-century science and policymaking, and if this framework has been contested in recent years, it nonetheless remains ubiquitous in both scientific and public discourse. Employing a transnational, diachronic perspective informed by historical semantics, this volume traces the conceptual history of the basic–applied distinction from the nineteenth century to today, taking stock of European developments alongside comparative case studies from the United States and China. It shows how an older dichotomy of pure and applied science was reconceived in response to rapid scientific progress and then further

transformed by the geopolitical circumstances of the postwar era.

Strategic Communication in Context: Theoretical Debates and Applied Research *UMinho Editora/CECS*

Strategic communication is becoming more relevant in communication sciences, though it needs to deepen its reflective practices, especially considering its potential in a VUCA world — volatile, uncertain, complex and ambiguous. The capillary, holistic and result-oriented nature that portrays this scientific field has led to the imperative of expanding knowledge about the different approaches, methodologies and impacts in all kinds of organisations when strategic communication is applied. Therefore Strategic Communication in Context: Theoretical Debates and Applied Research

assembles several studies and essays by renowned authors who explore the topic from different angles, thus testing the elasticity of the concept. Moreover, this group of authors represents various schools of thought and geographies, making this book particularly rich and cross-disciplinary.

New Faces, New Possibilities

Cultural Diversity and Structural Change in Institutes of Women Religious *Liturgical Press*

Religious sisters have created educational and healthcare systems over the past two hundred years that have transformed the Catholic community in the United States. Through their ministry, sisters have served waves of

immigrants and those pushed to the margins. The growing cultural diversity of newer sisters and the diminishing number of older sisters, therefore, is both a challenge and a creative moment to be critically examined. This book examines these changes in culture and ethnicity among sisters, the structural impact of diminishing numbers, and the creative response to this new reality for religious life in the United States. In it, sisters from a variety of generations, cultures, and institutes join with the Center for Applied Research in the Apostolate (CARA) researchers to examine and reflect on CARA's recent research findings and their impact on the life and ministry of sisters today.

Applied Research for Sustainable Change

A Guide for Education Leaders *Harvard Education Press*

In *Applied Research for Sustainable Change*, Sharon M. Ravitch and Nicole Mittenfelner Carl draw on twenty years of teaching and research to offer an incisive guide to practitioner-led qualitative research. They make the case for "local knowledge generation"--inquiry-based, school-level research that can contextualize quantitative data, enrich insight, and guide leaders in

making more effective decisions leading to sustainable organizational change. The authors offer a framework for conducting applied research that connects practitioner research to theories of transformational leadership and professional development. They show how to align research studies with the school's mission and context and offer step-by-step guidance on forming a research team, designing the research project, collecting and analyzing data, and formulating, sharing, and acting on results. In each chapter, they draw on examples provided by education leaders who have participated in their courses. This book provides an invaluable resource for empowering education leaders at a time when their professional judgment is often circumscribed or

dismissed. A central theme of the book is the power of participatory research to counter simplistic, often deficit-based narratives about patterns of student achievement and to foster transformational, sustainable change. Sharon M. Ravitch is a professor of practice at the University of Pennsylvania's Graduate School of Education. Nicole Mittenfelner Carl is a postdoctoral fellow in the Teaching, Learning, and Leadership Division at the University of Pennsylvania Graduate School of Education.
