Waves, Light, and Sound Homework Answer Keys | Curriki Library

Answer: E. When a car skids to a stop, the work done by friction upon the car is equal to the change in kinetic energy of the car. Work is directly proportional to the displacement of the car (skidding distance) and the kinetic energy is directly related to the square of the speed ($KE = 0.5 \cdot m \cdot v^2$). For this reason, the skidding distance is directly proportional to the square of the speed.

b. sound. c. standing. d. transverse.

Answer: A. In longitudinal waves, particles of the medium vibrate to and from in a direction parallel to the direction of energy transport. If energy is transmitted along a medium from the east end to the west end, then particles of the medium would vibrate eastward and westward.

Waves Review - Answers #1 - Physics Classroom

In one case, called a soft reflection, the phase constant remains unchanged and $\phi_2 = \phi_1$. In the other case, called a hard reflection, the phase constant of the reflected is completely out of phase with the phase constant of the incoming wave, so $\phi_2 = \phi_1 + \pi$. The gif below helps to visualize what we just described.
