Stored procedures are
nothing but named
blocks which contains
the group of SQL
statements to achieve
specific functionality.A
stored procedure or in
simple a proc is a

named PL/SQL block which performs one or more specific task. This is similar to a procedure in other programming languages. Stored Procedures accepts the different input parameters and gives the result as per requirement of user.

Stored Procedure Interview Questions | PL SQL Stored ...

A stored procedure is a prepared SQL code that you can save, so the code can be reused over and over again. So if you have an SQL query that you write over and over again, save it as a stored procedure, and then just call it to execute it. You can also pass parameters to a stored procedure, so that the stored procedure can act based on the

parameter value (s) that is passed.

SQL Stored Procedures - W3Schools

Stored Procedures and Functions Procedures and functions are schema objects that logically group a set of SQL and other PL/SQL programming language statements together to perform a specific task. Procedures and functions are created in a user's schema and stored in a database for continued use.

Procedures and Packages - Oracle

Stored Procedures You can store PL/SQL procedures in the database, and call these stored procedures from Oracle applications. Storing a procedure in the database offers many

advantages. Only one copy of the procedure needs to be maintained, it is in the database, and it can be accessed by many different applications.

Accessing Stored Procedures - Oracle
