Covering a much wider field than the usual specialist journals, Earth Science Reviews publishes review articles dealing with all aspects of Earth Sciences, and is an important vehicle for allowing readers to see their particular interest related to the Earth Sciences as a whole. Our readership is more diverse than that of specialist journals: as well as research scientists, also students, government agencies involved in programme support and management and in environmental assessment and ...

Earth-Science Reviews - Journal - Elsevier

We focus on interactions between the solid Earth, its water, its air and its living organisms, and on dynamic, interdependent relationships between these four components. Earth and environmental scientists also consider how these relationships produce environmental change at different timescales. To do this, they combine knowledge, models and methods drawn from geology, biology, physics and chemistry.
