Story Engineering Quotes by Larry Brooks

A better plan, he argues, is to start with the structure of a story – its engineering – and use that as the basis for narrative. His book shows how a novelist can work with six basic aspects of storytelling, four of them being elemental (and these are concept, character, theme and plot) and two are executional (scene construction and writing voice).

Creativity requires fluency (large amounts of ideas), flexibility of ideas (range of ideas) and originality. It is important to not focus on practically when generating ideas. Doing so would impede the flow of ideas and impractical ideas often point toward more practical options. Common problems that occur when brainstorming include using the first idea that pops up, inadequate competitive review, not involving entire team in

process and missing potentially strong solutions.
