Sustainable Agroforestry Systems and Practices in Agriculture

Agroforestry is a land-use system that combines trees, shrubs, or perennial vines with other agricultural crops and/or livestock. Agroforestry provides two major benefits for farmers: it adds perennial components to the farm (adding new long-term income sources) and creates a more diverse system of plants on the farm that better mimics a natural ecosystem.

Agroforestry | Sustainable Agriculture Research ...

Agroforestry in Sustainable Agricultural Systems examines the environmental and social conditions that affect the roles and performance of trees in field- and forest-based agricultural production...

Agroforestry in Sustainable Agricultural Systems - Google ...

Agroforestry is a land use management system in which trees or shrubs are grown around or among crops or pastureland. This diversification of the farming system initiates an agroecological succession, like that in natural ecosystems, and so starts a chain of events that enhance the functionality and sustainability of the farming system.

Agroforestry - Wikipedia

The practice of agroforestry has been described as a 'win-win' approach to management, as it offers the opportunity for multifunctional land use, which can simultaneously benefit food and fuel production, environmental and biodiversity protection, and allow farms to adapt to or mitigate the effects of climate change.

Agroforestry for sustainable intensification of agriculture

Increasing evidence points towards agroforestry being a sustainable alternative to agricultural systems that are heavily reliant on external inputs. This technical note highlights the potential benefits and impacts of using an agroforestry system for low-input and organic dairy systems.

Agroforestry for livestock systems | Agricolgy

Agroforestry describes farming systems that combine trees and shrubs with agricultural crops or livestock. Agroforestry can be designed in a way that avoids potential trade-offs between food production and other public goods that occur in many modern farming systems. Menu top middle bottom. Agroforestry training in Fiji is increasing the knowledge and capacity of farmers to improve food, nutrition and income security as well as improve their resilience to climate change while conserving biodiversity.

Agroforestry for sustainable farming in Fiji | World ...

Agroforestry in Sustainable Agricultural Systems examines the environmental and social conditions that affect the roles and performance of trees in field- and forest-based agricultural production systems. Various types of ecological settings for agroforestry are analyzed within temperate and tropical regions.

Agroforestry in Sustainable Agricultural Systems Advances ...

Agroforestry is a concept of integrated land use that combines elements of

agriculture and forestry in a sustainable production system. In its simplest form, agroforestry can be described as 'growing trees on farms' and includes the integration, both ecologically and economically, of the woody elements that may already be present in agricultural landscapes, such as hedgerows, windbreaks, buffer zones, trees in pasture, and small woodlands.
