Triangulation Development Method Engineering Drawing

Triangulation is a geometric
development process used to create
patterns of conical and transition
shapes. Triangulation allows you to
determine the true length of a line or
surface on a drawing by creating a right
angled triangle. Look at the diagram
below. A right angled triangle is formed
by taking the distance between two
points (example C7) on the top view,
placed against the vertical height
(example - the centre line of the front
view) of the shape.
