The Black Wolf's Mark III by Pet Torres - Goodreads

A black wolf is a melanistic colour variant of the gray wolf. Black specimens were recorded among red wolves, though the colour morph in this species is probably now extinct. Genetic research from the Stanford University School of Medicine and the University of California, Los Angeles revealed that wolves with black pelts owe their distinctive coloration to a mutation which

occurred in domestic dogs, and was carried to wolves through wolf-dog hybridization. Besides coat and knee colour, they are
