Beef Cattle Production Systems Modular Texts Series [PDF ...
Systems of commercial beef cattle production may be divided into three general categories: (1) the cow calf segment which produces weaned feeder calves for further grazing and/or feeding, (2) the backgrounding or stocker phase of production in which body weight is added to recently weaned calves, resulting in the finishing phase of The cowcalf and backgrounding categories are best suited for Arkansas conditions.

2 Systems of Cattle Production - uaex.edu
After all, beef production is based on cows, which are bred and produce calves. A weaner system is therefore the cow herd run on one farm and the progeny are moved elsewhere for further processing, in contrast to tolly and ox systems where further processing takes place on the same farm. The herd compositions reflected in Addendum A are idealised (theoretical) structures and the percentage herd compositions reflected in Table 1 are the average for the year, whereas herd composition changes ...

Beef Cattle Production Systems Modular Texts Series [EBOOK]
Beef farming in Ireland is characterised by many different beef production systems where cattle are sold off farms for further finishing on another farm or else are sold direct to slaughter. Our national suckler herd supplies a significant proportion of the cattle slaughtered each year but with an expanding national dairy herd there is an increasing supply of calves of dairy origin that are ...
