If you have a Bernina 780 and it won’t turn on, just turn the machine off again and wait for about 3 hours. This should reset the electronic parts inside. If you have a Bernina 880 the cause for not turning on may be the battery inside. For the Bernina 440 it may be a bad power board that keeps your sewing machine from turning on.

I also have a 125 Activa, bought when my husband was working at repairing Bernina machines in a local shop, part time. He got it in 2004 for about \$800. I've made many lap quilts on it, and only a few larger quilts; I agree, the harp, or throat space, limits what can be 'stuffed' through it.
