ThiNQ!™ pGLO™ Transformation and Inquiry Kits | Ward's Science

Genetic engineering is the process of manipulating the genetic material of an organism — often to include the DNA from a foreign organism. Using the classic pGLO Bacterial Transformation Kit, students transform bacteria by introducing a gene from the bioluminescent jellyfish *Aequorea victoria*. The same procedure has been used to create "designer proteins" which have led to the explosion of new health treatments, agricultural applications, and environmental solutions.
