Fieldbuses For Process Control Engineering Operation

Process fieldbuses are designed to communicate with process instruments and actuators. The two most common are Profibus PA and Foundation fieldbus (FF). Process fieldbus deployments began in oil refineries and chemical plants where there are often huge populations of devices, but adoption has spread into many more areas such as water treatment and pharmaceutical manufacturing.

Fieldbuses For Process Control Engineering Operation

Fieldbus is the name of a family of industrial computer networks used for real-time distributed control. Fieldbus profiles are standardized by the International Electrotechnical Commission as IEC 61784/61158. A complex automated industrial system is typically structured in hierarchical levels as a distributed control system. In this

hierarchy the upper levels for production managements are linked to the direct control level of programmable logic controllers via a non-time-critical communications
