FD Trinitron/WEGA is Sony's flat version of the Trinitron picture tube. First introduced in 1998 on Sony's 32-inch and 36-inch televisions, this technology was also used in computer monitors bearing the Trinitron mark. Flat CRTs reduce the amount of glare on the screen by reflecting much less ambient light than spherical or vertically flat CRTs. Flat screens also increase total image viewing angle. Sony ended CRT production including the FD Trinitron worldwide in

2008.

Sony Wega Trinitron 21 Manual Best Version

'Wega' is Sony's name

for its patented
picture/motion
processing technology
- its a digital
processing 'system'
which Sony claims
enhances the quality of
the signals which

eventually 'drive' the
actual (trinitron) crt. So
they are quite
different. If your tv has
Wega and Trinitron on
it then it has both of
these quite separate
technologies.
