Return to the Brain of Eden *Simon and Schuster*

An exploration of our fall from the pinnacle of human evolution 200,000 years ago and how we can begin our return • Explores recent neurological and psychological research on the brain and the role of plant biochemistry in human brain expansion • Explains how humanity's prehistoric diet change led to a neurodegenerative condition characterized by aggression and a fearful perception of the world • Outlines a strategy of raw foods, tantric sexuality, shamanic practices, and entheogens to reverse our mental degeneration and restore our advanced abilities Over a period of a million years the human brain expanded at an increasingly rapid rate, and then, 200,000 years ago, the expansion abruptly stopped. Modern science has overlooked this in order to maintain that we are at the pinnacle of our evolution. However, the halt in brain expansion explains not only recently uncovered anomalies within the human brain but also the global traditions of an earthly paradise lost and of humanity's degeneration from our original state of perpetual wonder and joy. Drawing on more than 20 years of research, authors Tony Wright and Graham Gynn explore how our modern brains are performing far below their potential and how we can unlock our higher abilities and return to the euphoria of Eden. They explain how for millions of years early forest-dwelling humans were primarily consuming the hormone-rich sex organs of plants--fruit--each containing a highly complex biochemical cocktail evolved to influence DNA transcription, rapid brain development, and elevated neural and pineal gland activity. Citing recent neurological and psychological studies, the authors explain how the loss of our symbiotic fruit-based diet led to a progressive neurodegenerative condition characterized by aggressive behaviors, a fearful perception of the world, and the suppression of higher artistic, mathematical, and spiritual abilities. The authors show how many shamanic and spiritual traditions were developed to counteract our decline. They outline a strategy of raw foods, tantric sexuality, shamanic practices, and entheogen use to reverse our degeneration, restore our connection with the plant world, and regain the bliss and peace of the brain of Eden.

From Eden to Eden

Taking Back Eden *Island Press*

Taking Back Eden is the gripping tale of an idea—that ordinary people have the right to go to court to defend their environment—told through the stories of lawsuits brought in eight countries around the world. Starting in the United States in the 1960's, this idea is now traveling the planet, with impacts not just on imperiled environments but on systems of justice and democracy. It has brought people back into the question of governing the quality of their lives. Author Oliver Houck describes the sites under contention in their place and time, the people who rose up, their lawyers, strategies, obstacles, setbacks and victories. Written for general readers, students, and lawyers alike, Taking Back Eden tells the stories of a lone fisherman intent on protecting the Hudson River, a Philippine lawyer boarding illegal logging ships from the air, the Cree Indian Nation battling for its hunting grounds, and a civil rights attorney who set out to save the Taj Mahal. The cases turn on Shinto and Hindu religions, dictatorships in Greece and Chile, regime changes in Russia, and on a remarkable set of judges who saw a crisis and stepped up to meet it in similar ways. Spontaneously, without communication among each other, their protagonists created a new brand of law and hope for a more sustainable world.

East of Eden *Penguin*

A masterpiece of Biblical scope, and the magnum opus of one of America's most enduring authors, in a commemorative hardcover edition In his journal, Nobel Prize winner John Steinbeck called East of Eden "the first book," and indeed it has the primordial power and simplicity of myth. Set in the rich farmland of California's Salinas Valley, this sprawling and often brutal novel follows the intertwined destinies of two families—the Trasks and the Hamiltons—whose generations helplessly reenact the fall of Adam and Eve and the poisonous rivalry of Cain and Abel. The masterpiece of Steinbeck's later years, East of Eden is a work in which Steinbeck created his most mesmerizing characters and explored his most enduring themes: the mystery of identity, the inexplicability of love, and the murderous consequences of love's absence. Adapted for the 1955 film directed by Elia Kazan introducing James Dean, and read by thousands as the book that brought Oprah's Book Club back, East of Eden has remained vitally present in American culture for over half a century.

Reinventing Eden *Routledge*

The Living Soil Handbook *Chelsea Green Publishing*

Principles and farm-tested practices for no-till market gardening--for healthier, more productive soil! From the host of the popular The No-Till Market Garden Podcast—heard around the world with over 850k downloads! Discovering how to meet the soil's needs is the key task for every market gardener. In this comprehensive guide, Farmer Jesse Frost shares all he has learned through experience and experimentation with no-till practices on his home farm in Kentucky and from interviews and visits with highly successful market gardeners in his role as host of The No-Till Market Garden Podcast. The Living Soil Handbook is centered around the three basic principles of no-till market gardening: Disturb the soil as little as possible Keep it covered as much as possible Keep it planted as much as possible. Farmer Jesse then guides readers in applying those principles to their own garden environment, with their own materials, to meet their own goals. Beginning with an exploration of the importance of photosynthesis to living soil, Jesse provides in-depth information on: Turning over beds Using compost and mulch Path management Incorporating biology, maintaining fertility Cover cropping Diversifying plantings through intercropping Production methods for seven major crops Throughout, the book emphasizes practical information on all the best tools and practices for growers who want to build their livelihood around maximizing the health of their soil. Farmer Jesse reminds growers that "as possible" is the mantra for protecting the living soil: disturb the soil as little as you possibly can in your context. He does not believe that growers should anguish over what does and does not qualify as "no-till." If you are using a tool to promote soil life and biology, that's the goal. Jesse's goal with The Living Soil Handbook is to provide a comprehensive set of options, materials, and field-tested practices to inspire growers to design a soil-nurturing no-till system in their unique garden or farm ecosystem. "[A] practical, informative debut. . . .Gardeners interested in sustainable agriculture will find this a great place to start."—Publishers Weekly "Frost offers a comprehensive, science-based, sympathetic, wholly practical guide to soil building, that most critical factor in vegetable gardening for market growers and home gardeners alike. A gift to any vegetable plot that will keep on giving."—Booklist (starred review)

River Out of Eden *Basic Books*

How did the replication bomb we call "life" begin and where in the world, or rather, in the universe, is it heading? Writing with characteristic wit and an ability to clarify complex phenomena (the New York Times described his style as "the sort of science writing that makes the reader feel like a genius"), Richard Dawkins confronts this ancient mystery.

She Reads Truth *B&H Publishing Group*

She wants faith, hope, and love. She wants help and healing. She wants to hear and be heard, to see and be seen. She wants

things set right. She wants to know what is true—not partly true, or sometimes true, or almost true. She wants to see Truth itself, face-to-face. But here, now, these things are all cloudy. Hope is tinged with hurt. Faith is shaded by doubt. Lesser, broken things masquerade as love. How does she find something permanent when the world around her is always changing, when not even she can stay the same? And if she finds it, how does she hold on? *She Reads Truth* tells the stories of two women who discovered, through very different lives and circumstances, that only God and His Word remain unchanged as the world around them shifted and slipped away. Infused with biblical application and Scripture, this book is not just about two characters in two stories, but about one Hero and one Story. Every image points to the bigger picture—that God and His Word are true. Not because of anything we do, but because of who He is. Not once, not occasionally, but right now and all the time. Sometimes it takes everything moving to notice the thing that doesn't move. Sometimes it takes telling two very different stories to notice how the Truth was exactly the same in both of them. For anyone searching for a solid foundation to cling to, *She Reads Truth* is a rich and honest Bible-filled journey to finally find permanent in a world that's passing away.

Return to the Garden of Eden *WestBow Press*

Return to the Garden of Eden is dedicated to refuting the unbiblical error of Replacement Theology, which supposes that God has spiritually replaced Israel with the Church. The problem with this understanding is, if God replaced Israel, who was promised an everlasting possession of land, then what good is His promise of an everlasting salvation to the Church. This book concentrates on the multitude of verses in scripture, which indicate that the national restoration of Israel is an absolute imperative. It demonstrates that Israel's existence today was not only predicted, but necessary for Christ to return to earth, just as He said He would. This book illuminates the fact that Israel being a nation in our time, is a miracle to be witnessed by we Christians, and a comfort and encouragement that God always keeps his word literally, not allegorically.

Seeking Eden *University of Georgia Press*

Seeking Eden promotes an awareness of, and appreciation for, Georgia's rich garden heritage. Updated and expanded here are the stories of nearly thirty designed landscapes first identified in the early twentieth-century publication *Garden History of Georgia, 1733-1933*. *Seeking Eden* records each garden's evolution and history as well as each garden's current early twenty-first-century appearance, as beautifully documented in photographs. Dating from the mid-eighteenth to the early twentieth centuries, these publicly and privately owned gardens include nineteenth-century parterres, Colonial Revival gardens, Country Place-era landscapes, rock gardens, historic town squares, college campuses, and an urban conservation garden. *Seeking Eden* explores the significant impact of the women who envisioned and nurtured many of these special places; the role of professional designers, including J. Neel Reid, Philip Trammel Shutze, William C. Pauley, Robert B. Cridland, the Olmsted Brothers, Hubert Bond Owens, and Clermont Lee; and the influence of the garden club movement in Georgia in the early twentieth century. **FEATURED GARDENS:** Andrew Low House and Garden | Savannah Ashland Farm | Flintstone Barnsley Gardens | Adairsville Barrington Hall and Bulloch Hall | Roswell Battersby-Hartridge Garden | Savannah Beech Haven | Athens Berry College: Oak Hill and House o' Dreams | Mount Berry Bradley Olmsted Garden | Columbus Cator Woolford Gardens | Atlanta
