A level Maths Worksheets: Conics | Teaching Resources

Here we will learn conic section formulas. Circles, ellipses, parabolas and hyperbolas are in fact, known as conic sections or more commonly conics. As they can be obtained as intersections of any plane with a double-napped right circular cone.

Conic section formulas: Circle, Ellipse, Parabola ...

In mathematics, a conic section (or simply conic) is a curve obtained as the intersection of the surface of a cone with a plane. The three types of conic section are the hyperbola, the parabola, and the ellipse; the circle is a special case of the ellipse, though historically it was sometimes called a fourth type. The ancient Greek mathematicians studied conic sections, culminating around 200 ...
