The economics of religion concerns both the application of the techniques of economics to the study of religion and the relationship between economic and religious behaviours. Max Weber first identified the relationship between religion and economic behaviour, attributing in 1905 the modern advent of capitalism to the Protestant reformation. Adam Smith laid the foundation for economic analysis for religion in *The Wealth of Nations*, stating that

religious organisations are subject to market force

Economics of religion - Wikipedia

Religion and Economy Rachel M. McCleary and Robert J. Barro Religion has a two-way interaction with political economy. With religion viewed as a dependent variable, a central question is how economic development and political institutions affect religious participation and beliefs. With religion viewed as an independent variable, a key issue ...

Religion and Economy - American Economic Association

Religious economy refers to religious persons and organizations

interacting within a market framework of competing groups and ideologies. An economy makes it possible for religious suppliers to meet the demands of different religious consumers. By offering an array of religions and religious products, a competitive religious economy stimulates such activity in a market-type setting.
