Comparing Two Proportions Guide Answers

In order to make this comparison, two
independent (separate) random samples

need to be selected, one from each
population. The null hypothesis H_0 is
that the two population proportions are
the same; in other words, that their
difference is equal to 0. The notation for
the null hypothesis is $H_0: p_1 = p_2$,
where p_1 is the proportion from the first
population, and p_2 is the proportion from
the second population.
