The theory of discovery learning assumes that children learn best through experimentation and discovery of facts

and relationships on their own. Rather than being asked to memorize facts or learn by listening, children are asked to manipulate materials, experiment, make assumptions and discover by themselves.

Guided Discovery Math Lesson Plans & Worksheets Reviewed ...

The goal of discovery-based math is to

make it more meaningful for children. If a child can make the correct conclusions on her own through logical thinking and deduction, the concepts will be easier to remember. However, in a recent study released by the Frontier Centre for Public Policy, the following conclusion was made: "traditional math education methods are superior to the highly ineffective, discovery-based instructional techniques that are in vogue now in educational curricula."

The Problem with Discovery-Based Math

Starting with a discovery lab meant starting with a guided inquiry lesson. Students made observations about patterns and tried to write rules to describe what they saw. Even though we

hadn't formally introduced systems of equations yet, students looked at a variety of situations with systems of equations.

History of Algebra: Lesson for Kids | Study.com

This discovery carries the invention of algebra back to about 1700 B.C., if not earlier. It is probable that the algebra of the Egyptians was of a most rudimentary nature, for otherwise we should expect to find traces of it in the works of the Greek aeometers. of whom Thales of Miletus (640-546 B.C.) was the first.
