Reliability based multidisciplinary design optimization of ...

The influence of uncertainty factors must be considered to ensure the reliability of the optimized design results, and reliability-based multidisciplinary design optimization (RBMDO) needs to be performed [4, 5]. Uncertainties can be categorized as aleatory and epistemic [6, 7]. Aleatory or objective uncertainties arise from the inherent randomness of a system.

In this paper, a subset simulation-based reliability analysis (SSRA) approach is combined with multidisciplinary design optimization (MDO) to improve the computational efficiency in reliability-based MDO (RBMDO) problems.

Reliability-Based Multidisciplinary Design Optimization ...

Abstract. Reliability-Based Optimization (RBO) for engineering design deals mainly with two design attributes, namely the merit, for example cost, and

the reliability of the design. In this work the class of design problems which are considered, are designs characterized by a minimum merit function and that satisfy certain reliability constraints. The reliability constraints are typically constraints on the probabilities of failure due to component failure events or a system failure event.
