This International Standard defines the basic terminology and specifies the methodology and principles for risk assessment and risk reduction to help designers in achieving safety in the design of machinery. These principles reflect the knowledge and experience of the design, use, incidents, accidents, and risks associated with machinery, and provide the basis for assessing and for the removal of hazards or the reduction of risks during the relevant phases of the life cycle

of machinery.

DS/EN ISO 12100:2011

EN ISO 12100 Safety of machinery - Basic concepts, general principles for design is one of the most important machinery safety standards. It is harmonised to the Machinery Directive, so complying with its requirements (and those of other relevant harmonised standards) will generally be the shortest route to demonstrating that the Essential Health and Safety Requirements of the Directive have been met.
