**Comprehensive
Healthcare
Simulation: Mastery
Learning in Health
Professions
Education** *Springer
Nature*

This book presents the parameters of Mastery Learning (ML), an especially stringent variety of competency-based education that guides students to acquire essential knowledge and skill,

measured rigorously against a minimum passing standard (MPS). As both a scholarly resource and a teaching tool, this is a “how to” book that serves as a resource for a wide variety of health professions educators. A seminal source of information and practical advice about ML, this book divided into five parts: Clinical Education in the Health Professions, The Mastery Learning Model, Mastery Learning in Action, Transfer of Training from Mastery Learning and The Road Ahead. Complete with high-quality images and tables, chapters take an in-depth look into ML principles and practices across the health professions. Specific educational content instructs

readers on how to build and present ML curricula, evaluate short and long-run results, conduct learner debriefing and give powerful feedback, set learner achievement standards, and prepare faculty for new educational roles. An invaluable addition to the Comprehensive Healthcare Simulation Series, *Mastery Learning in Health Professions Education* is written and edited by leaders in the field for practicing clinicians in a variety of health professions.

**Innovative
Assessment in
Higher Education**
Routledge

Throughout higher education assessment is changing, driven by increased class size,

changing curricula and the need to support students better. At the same time assessment regulations and external quality assurance demands are constraining assessment options, driven by worries about standards, reliability and plagiarism. Innovative Assessment in Higher Education explores the difficulty of changing assessment in sometimes unhelpful contexts. Topics discussed include: problems with traditional assessment methods rationales behind different kinds of innovation in assessment complex assessment contexts in which teachers attempt to innovate innovation in assessment within a range of academic

settings theoretical and empirical support for innovations within higher education. More than a 'how to do it' manual, this book offers a unique mix of useful pragmatism and scholarship. A vital resource for higher education teachers and their educational advisors, it provides a fundamental analysis of the role and purpose of assessment and how change can be managed without compromising standards.

Routledge

Contextualising why assessment is still the single most important factor affecting student learning in higher education, this second edition of *Innovative Assessment in Higher Education: A Handbook for Academic Practitioners* offers a critical discourse about the value of

assessment for learning alongside practical suggestions about how to enhance the student experience of assessment and feedback. With 17 new chapters this edition: contextualises assessment within the current higher education landscape; explores how student, parent and government expectations impact on assessment design; presents case studies on how to develop, incorporate and assess employability skills; reviews how technology and social media can be used to enhance assessment and feedback; provides examples and critical review of the use and development of feedback practices and how to assess professional, creative

and performance-based subjects; offers guidance on how to develop assessment that is inclusive and enables all students to advance their potential. Bridging the gap between theory and the practical elements of assessment, *Innovative Assessment in Higher Education: A Handbook for Academic Practitioners* is an essential resource for busy academics looking to make a tangible difference to their academic practice and their students' learning. This practical and accessible guide will aid both new and more experienced practitioners looking to learn more about how and why assessment in higher education can make such a difference to student learning.
