Structural engineers must have the competence and confidence to design in prestressed concrete (PSC). Part of the knowledge gained by students in this subject is a further understanding of PSC

behaviour and competence in PSC design so that the appropriate use of this structural material can be made in decisions on future structural designs.

49150 Prestressed Concrete Design - UTS: Handbook

Introduction 1.1 Background The idea of prestressed concrete has been around since the latter decades of the 19th century, but its use was limited by the quality of the materials at the time. It took until the 1920s and '30s for its materials development to progress to a level where prestressed concrete could be used with confidence.
