Think what information you need to collect in that documentation; suggestions could be: number of physical locations (where your company works), how those locations are connected (wireless, wired), number of routers, switches, firewalls, servers in each location (with passwords, types of operating systems, update management, types of hardware, types of RAID, period

of guarantee offered by ...

How to Create a Network

Documentation: 7 Steps (with Pictures)

Without a security policy, the availability of your network can be compromised. The policy begins with assessing the risk to the network and building a team to respond. Continuation of the policy requires implementing a security change management practice and monitoring the network for security violations. Lastly, the review process modifies the existing policy and adapts to lessons learned.
